SPLIT THE WIND

At highway speed, you take the wind full-force in the chest, causing fatigue in your arms, neck and shoulders. Take the pressure off with an easy-to-install detachable windshield. Shaped to divert air, rain and road debris around the rider, a windshield can add hours of riding comfort.

LINE OF SIGHT

To avoid looking through bug spots, condensation and road grime, select a windshield that tops out just below your line of sight.

WINDSHIELD TYPES

SUPER SPORT

Eliminates wind and debris, but keeps the wind-in-the-hair feeling. Ideal for a cool morning ride to the office, the sleek profile hugs the front lamps for a sporty look.

COMPACT

Traditional king-sized shape with a minimalist edge. For Harley-Davidson® custom and cruiser models, the Compact windshield provides wind and weather protection for everyday riding.

TOURING

Add maximum weather protection to your sporting motorcycle. Contoured to divert the wind around the rider's helmet and hands, a Touring windshield means long-ride comfort.

VENTILATOR WINDSHIELD

Ventilator Windshields feature side-mounted vents that allow you to adjust the airflow to match the riding conditions. Opening the vents redirects the air across your chest for a cooling effect, and closing the vents provides maximum wind and weather protection.

DETACHABLE MOUNTS

Designed to be installed or removed without tools in seconds, a detachable windshield gives you the freedom to define your ride at the drop of a hat. Ride across the country protected from the elements, then quickly remove the windshield to hit the streets in style.

TEMPERATURE CONTROL

Extend your riding season. Full coverage Soft Lower provides wind and mud protection for the rider's legs and boots, and minimize cold updrafts as the weather changes. Covers simply clip in place for speedy installation, and can be easily removed as temperatures rise.

A. VENTILATOR COMPACT DETACHABLE WINDSHIELD

A. VENTILATOR COMPACT DETACHABLE WINDSHIELD

In a nutshell, a windshield should provide a barrier between the rider and errant bugs, discarded cigarette butts, flying debris and bad air. The shield should manage airflow and wind blasts to create a pocket of still air for both rider and passenger comfort. But if you ride in a warm climate, or spend time at low speeds stuck in traffic, you need to keep some air circulating around your body to stay comfortable. The Ventilator Windshield features clear injection molded vents that allow you to adjust the airflow to match the riding conditions. Opening the vents redirects the air across your chest for a cooling effect, and closing the vents provides maximum wind and weather protection. But when you want to ride "naked," the Detachable shield can be removed completely and reinstalled in seconds to match your riding mood.

SEAT OF POWER

The right seat is equal parts ergonomics and comfort. Its shape anchors your position and determines the reach to the ground and to the controls, and the padding supports your tailbone and hips to relieve stress and pressure. Pick the right one for you — and your passenger.

PAMPER YOUR BEHIND

Experience ultimate comfort. Road Zeppelin® Seat Pads are equipped with a unique air bladder system that distributes rider weight across the entire seating surface. By reducing pressure points and providing shock absorption, this pad allows you to ride your cool low profile seat for hundreds of miles. The mesh cover lets air circulate beneath the rider's body, reducing the temperature between the rider and seat. The easy-to-reach integrated hand pump and air release valve permits quick and convenient adjustment.

CHANGING YOUR SEAT

Switching out your seat is simple. And because certain rides call for certain styles, some folks like to have multiple seats to match the occasion. Install a comfortable, supportive touring seat for the longer treks, and swap it out for a low-profile seat for a night on the town. Please see your owner's manual for proper removal and installation of seats.

SPORTSTER® SEAT TYPES

Solo or two-up, comfort or style, check out these seats to get an idea of where you want to sit.

LOW-PROFILE SEATS

These saddles combine radical styling with a "deep-in-the-bike" riding position. Long and lean, Badlander®, Brawler® and Sidekick® seats bring you lower to the ground than most other seats.

TOURING SEATS

Designed for comfort, Sundowner™ and Signature Series® seats offer a broad seating surface to reduce pressure points and a dished shape holds you in place and provides additional back support.

SIGNATURE SERIES
SOLO SEATS

REDUCED REACH® SEATS

Get even closer. This Solo Seat is shaped to move the rider 3" forward and 1" lower for a confident reach to the hand and foot controls. The narrow nose brings the legs 1" closer together for a comfortable reach to the ground, and the scooped bucket-shape and back support keeps the rider from sliding backward during acceleration.

SIGNATURE SERIES® SOLO SEAT

The wide seating area keeps the rider extra comfy on a long trip, and the narrow nose keeps your legs closer together for easier city driving. This solo seat features an easily removable and adjustable rider backrest that provides extra support, and keeps you anchored in place for riding confidence.

COMFORT ON THE GO

With a detachable backrest and luggage rack, your bike can go from a stripped-down afternoon cruiser to a fully loaded two-up touring machine in seconds. Comfort- and convenience-driven accessories make for a less stressful ride.

THE RIGHT COMBINATION

BUILD YOUR OWN

A detachable sissy bar upright and backrest pad is the starting point for a complete touring machine. Start by shopping the following pages and selecting all the components required for your particular model.

ALL IN ONE

For old school looks and modern convenience, consider adding a One-Piece Detachable Sissy Bar. The tall slim bar and the upper kick angle mimics the classic '60s shape, while the detachable mount lets you strip down the bike at a moment's notice.

LOAD IT UP

Rain gear, extra clothing and basic supplies are easy to take along when you add luggage to your bike. Designed for maximum versatility, this complete collection of sissy bar- and luggage rack-mounted soft touring luggage ensures you will pack what you need for your next trip.

Designed by riders, for riders, the Premium Luggage Collection is formed of superior heavy-weight ballistic nylon to maintain their shape and protect your belongings over the long haul. And the secure spandex mounting system slips over the passenger backrest for a snug fit.

EQUIPPED FOR THE MILES AHEAD

Solo and stripped down, two-up and fully loaded, or anywhere in between, you can tailor any Harley-Davidson® motorcycle to meet the demands of the highway.

JUST THE BASICS

Stripped to the essentials, your ride is ready for your commute or for a night on the town. Detachable accessories let you install and remove the gear required for today's trip.

HIT THE ROAD

Go it alone. Saddlebags hold a change of clothes, a rain suit and the basic travel gear. And a solo rack and soft bag can be added to carry the souvenirs you pick up on the way.

SOLO TOURING

The ultimate road trip. The detachable saddlebags and Tour-Pak® offer tons of storage space, and the Solo Mounting Rack positions the Tour-Pak Pad for maximum rider back support.

TWO-UP DAY TRIPPING

Take a friend. Saddlebags carry your clothes and the essentials, the luggage rack and a duffel bag hauls the rest, and a passenger backrest provides hours of riding comfort.

CHANGING YOUR BACKREST

With a Docking Hardware Kit installed, adding or removing a Detachable accessory is a simple "slide and click" proposition. Rotate the cam-lock to release the sissy bar from the rear docking points. Pivot the sissy bar forward, and lift it free from the front docking points.

Choosing a Backrest

A sissy bar upright and passenger backrest are the starting point to build a complete touring machine. The backrest provides long-range comfort and support, and adds a feeling of control and confidence for the passenger. For permanent installation, choose rigid sideplates and a style of upright that suits your riding style. For added flexibility, choose a Detachable Sideplate Kit and appropriate Docking Hardware to make adding or removing a Detachable accessory a simple "slide and click" proposition.

A STRONG FOUNDATION

Being sure-footed at a stop or when parking your bike enhances your feeling of control and confidence. Adjusting the ride height by lowering the suspension may be the first step in fitting the bike to your inseam length. Combining a low-profile suspension and a narrow seat is the easiest way for a shorter rider to fit comfortably on a larger bike.

SUSPENSION

While most current Sportster® models are already equipped with low-profile suspension, Harley offers optional two-up shocks that maintain the low ride height and add additional carrying capacity. Or, if you are willing to exchange the low-profile "slammed" look for improved ride comfort, Comfort Flex standard-length shocks deliver an improved ride through a longer stroke.

ESTABLISH YOUR POSITION

HANDLEBARS

Where the bar positions your hands, wrists and arms directly affects how you feel on the motorcycle. The shape of the bar determines your reach to the hand controls and, therefore, your overall comfort.

REDUCED REACH

Available for specific models, the Easy Squeeze Handlebar features an offset clutch-side grip that moves the palm 1/2" closer to the controls. The position provides improved leverage and permits the rider to reach the clutch lever with the stronger part of the hand.

STOCK REACH

FORWARD CONTROLS

Where your feet contact the controls can often determine how many miles you can put on in a day. Mid-controls position your feet below the knee for a sporting riding posture, while forward controls stretch your legs for a relaxed, laid-back posture.

E. PERFORMANCE SUSPENSION KIT

Maximize the canyon-carving ability of your XR1200™ motorcycle with this complete Performance Suspension Kit. Fully-adjustable light-weight suspension system features Showa®'s new Big Piston Front (BPF) fork design. The BPF eliminates many of the internal components used in a cartridge-type fork, simplifying construction and resulting in lighter overall fork weight. The large diameter of the BPF's internal piston allows a reduction in damping pressure for better feedback and smoother action. This performance suspension kit also provides a very controlled feeling which leads to more rider confidence. The BPF's rebound and compression damping force settings are easily fine-tuned via two adjuster screws located on top of the fork bolts. The spring pre-load is adjusted via a M5 hex screw on the axle holders. The rear Showa shocks feature 36mm pistons with piggyback nitrogen-charged reservoirs. The compression damping can be adjusted via a knob on top of the piggyback reservoir. The rebound is adjusted with a thumb wheel on the lower clevis. Rear spring pre-load is also adjustable on the shock for optimum 1G sag. The kit includes one set of Big Piston Front Forks and one set of rear shocks.

54530-10 **\$1,499.95**

Fits '08-'10 XR1200 models. Stock on '10-later XR1200X™ models.

F. REDUCED REACH FORWARD CONTROL CONVERSION KIT*

Love the look and riding position you get with forward controls but not comfortable with the long stretch forward? This Forward Control Conversion Kit repositions the Original Equipment footpegs and foot controls up and back by 2", and positions the controls closer to the rider for added comfort and confidence. This kit provides additional leg clearance around the chassis and air cleaner by moving the footpegs outward 1.5" (left) and 0.5" (right). The reduced reach places the rider's boot at the proper pivot point for improved leverage, while maintaining the "foot-forward" riding profile. This easy-to-install Conversion Kit includes heavy-duty steel mounts and shortened brake rod, and reuses Original Equipment control supports and brake and shift levers, or can be personalized with your choice of custom lever styles.
